標題: Political Appointment System

Dear sir/madam,

I have discussed this issue with many friends and colleagues and have never heard of a single positive comment.

They all believe CE will go ahead with the plan no matter what the consultation result is. Even so, I still want to

express our views.

We strongly oppose further develop the political appointment system. It will waste more tax payers' money and

will not improve the governance. Such development will further damage the political neutrality of the civil servants.

It cannot help grooming political talents and can only serve to give benefits to particular groups of political parties.

Such unfairness will result in more conflicts in the society.

Regards,

Carl LAM
