Co-operation between Hong Kong and the Mainland – Hong Kong / Guangdong Co-operation

Purpose

This paper briefs Members on the major outcomes of the 21st Working Meeting of the Hong Kong / Guangdong Co-operation Joint Conference held on 23 March 2016 in Hong Kong.

21st Working Meeting of the Hong Kong / Guangdong Co-operation Joint Conference

Background

2. At the 18th Plenary of the Hong Kong/Guangdong Co-operation Joint Conference held in September last year, the Chief Executive and the Governor of Guangdong Province, leading delegations from the two sides, reviewed the progress of implementation of the 2015 Work Plan of the Hong Kong/Guangdong co-operation and reached consensus on the key areas for further co-operation. The Plenary agreed to further strengthen co-operation in areas such as the Belt and Road Initiative, Guangdong Free Trade Pilot Zone, liberalisation of trade in services, financial co-operation, professional services, innovation and technology, environmental protection, youth co-operation, cultural exchange, and education co-operation.

3. The Chief Secretary for Administration, Mrs Carrie Lam, and the Vice-Governor of Guangdong Province, Mr He Zhongyou, co-chaired the 21st Working Meeting of the Hong Kong/Guangdong Co-operation Joint Conference in Hong Kong on 23 March 2016 and signed the “2016 Work Plan” of the Framework Agreement on Hong Kong/Guangdong

Co-operation on the above consensus (attached at Annex, Chinese version only), which covers 92 co-operation items in various areas.

Progress and direction of co-operation

The Belt and Road Initiative

4. The Belt and Road Initiative is a key medium and long term development initiative of our country in the future. Upon the issuance of the “Vision and Actions on Jointly Building Silk Road Economic Belt and 21st-Century Maritime Silk Road” last year, the SAR Government has immediately embarked on the planning work and proposed to capitalise on the pillar industries where Hong Kong enjoys clear advantages, namely financial services, trade and logistics, high-end services and tourism to actively facilitate and complement the nation to implement the Belt and Road Initiative.

5. On financial services, the SAR Government encourages Guangdong enterprises to fully make use of Hong Kong as a platform to invest in the infrastructure and other key development projects in the Belt and Road countries. On the logistics front, both Guangdong and Hong Kong will organise more trade and investment promotion activities in the Belt and Road countries and regions, so as to further strengthen the economic and investment ties with these places.

6. On high-end services, the SAR Government encourages co-operation between the legal and arbitration sectors in Guangdong and Hong Kong so that both sides could complement each other and provide Mainland, Hong Kong and cross-boundary legal and dispute resolution services for Mainland enterprises when they pursue opportunities for trade and investment under the Belt and Road Initiative. The SAR Government also encourages Guangdong enterprises to work together with the Hong Kong construction and engineering enterprises in launching construction projects in the Belt and Road countries and to engage architectural and engineering-related professionals and enterprises in Hong Kong to participate in the planning, construction and management of the projects, as well as to provide consultancy services. Besides, the SAR Government has also set aside \$200 million

to support the professional services sectors in enhancing exchanges, promotion and co-operation with the Belt and Road countries and with the Mainland. On tourism, both sides will enhance co-operation to expand the cruise tourism market in Asia and develop regional cruise itineraries, so as to develop the tourism market in the Belt and Road regions as well as promote community exchanges with these places.

Innovation and Technology

7. The Dedicated Chapter of Hong Kong and Macao in the “Outline of the 13th Five-Year Plan for the National Economic and Social Development of the People's Republic of China” (the 13-5 Plan) proposes innovative development as a new driver for economic growth. Innovation and technology has been an important co-operation area between Guangdong and Hong Kong. Since its inception in 2004 to February this year, the Guangdong-Hong Kong Technology Co-operation Funding Scheme has approved funding of over HK\$800 million under the Innovation and Technology Fund for a total of 238 co-operation projects straddling across areas such as electronics, nano-technology, new energy vehicles, artificial intelligent robotics, information technology, etc. Looking ahead, both places will focus on strengthening technology transfer, and through the funding projects under the scheme, enhance exchanges on research and development result and interaction among the Government, industry, academia and research sectors to enhance the competitiveness of innovation and technology industry of the two places. In addition, Guangdong and Hong Kong have also set up the “Hong Kong/Guangdong ICT Expert Committee” to actively promote technological development and industry co-operation in cloud computing, big data, Internet of Things, smart city, etc.

Co-operation in Key Regions

8. The Dedicated Chapter of Hong Kong and Macao in the 13-5 Plan expresses support in expediting development of Guangdong-Hong Kong-Macao co-operation platforms such as Qianhai, Nansha and Hengqin. The SAR Government will strengthen exchange and co-operation with the three regions. On Qianhai, the SAR Government will continue to make good use of the existing collaboration mechanism

to closely co-operate with Shenzhen and Qianhai to push forward the realisation of the “Ten Thousand, Thousand, Hundred and Ten” development target and to introduce more preferential measures for Hong Kong enterprises and professionals, so as to help them open up the markets in the Mainland. On the principle of achieving mutual benefits through active participation and joint planning, the SAR Government will actively promote the development of Nansha. The SAR Government also looks forward to the further expansion of liberalisation measures for Hong Kong service sectors in Hengqin, so as to benefit more Hong Kong enterprises and professionals.

Liberalisation of Trade in Services

9. On the basis of the Agreement between the Mainland and Hong Kong on Achieving Basic Liberalisation of Trade in Services in Guangdong signed in 2014, the Mainland and Hong Kong signed the Agreement on Trade in Services under the framework of CEPA late last year, which has realized the objective of basically achieving liberalisation of trade in services between the Mainland and Hong Kong by the end of the National 12-5 Plan period. The Agreement will be implemented from 1 June 2016. The SAR Government hopes that the Mainland will timely formulate the implementation arrangement for the various liberalisation measures set out in the Agreement, so as to ensure that they are effectively put in place.

Youth Co-operation

10. On youth co-operation, the Guangdong Provincial Government supported the Funding Scheme for Youth Internship in the Mainland and assisted in arranging for more than 500 Hong Kong youths who joined the scheme to take up internships in enterprises, agencies and organisations in the Guangdong Province last year. This year, the SAR Government will continue to work closely with the Guangdong Provincial Government to increase the internship places offered by Guangdong agencies and enterprises to more than 900 places, with a view to providing more diversified internship opportunities for Hong Kong youths. The SAR Government also plans to launch the Youth Development Fund within this year to provide financial support in the

form of matching fund to non-governmental organisations for launching youth entrepreneurship projects to assist young people who would like to start their own business. Guangdong and Hong Kong will also encourage young people of the two places to collaborate on entrepreneurial projects in the coming year.

Financial Co-operation

11. The recently promulgated 13-5 Plan Dedicated Chapter has laid out the country's support for Hong Kong in consolidating and enhancing its status as an international financial centre, strengthening its status as a global offshore Renminbi (RMB) business hub and an international asset management centre. The establishment of the China (Guangdong) Pilot Free Trade Zone (GDFTZ) has also brought about more opportunities for financial co-operation between Hong Kong and Guangdong. This year, both places will continue to push forward the offshore and cross-boundary RMB business, encourage financial institutions and corporates in the GDFTZ to utilise the RMB platform in Hong Kong for cross-boundary investment and financing activities, including issuing RMB bond in Hong Kong, borrowing RMB funds through Hong Kong, and guiding these funds to participate in the development of the GDFTZ.

12. As regards deepening of co-operation of the securities market, both places will work together to seek policy support from the Central Government to lower the entry thresholds of Hong Kong financial institutions and to relax the shareholding percentage policies of joint venture securities, fund and futures companies held by Hong Kong-funded financial institutions, so that more eligible Hong Kong financial institutions will be allowed to provide services in Guangdong, thus facilitating the mutual access to capital markets of both places. As regards the level of activities under the arrangement on mutual recognition of funds arrangement, a total of 32 Mainland funds have been recognised by the Securities and Futures Commission as at 18 April 2016, 11 of which are managed by fund companies with Guangdong background. Guangdong and Hong Kong will continue to encourage more funds companies in both places to participate in the mutual recognition of funds arrangement.

Professional Services

13. On professional services, both places will step up efforts to strengthen co-operation in professional sectors in particular the legal, and the construction and engineering sectors in this year. On legal services, a total of nine associations between Hong Kong and Mainland law firms operating in the form of partnership had been given approval to operate in the pilot areas of Qianhai, Nansha and Hengqin. We welcome the recent approval by the Mainland side for the extension of the geographical application for the measure of establishing associations in the form of partnership from the above-mentioned three pilot areas to Guangzhou, Shenzhen and Zhuhai. Guangdong and Hong Kong will continue to seek the extension of the scope to cover the entire Guangdong Province, so as to provide better cross-boundary legal services for Mainland clients. As for construction and related engineering services, Qianhai is currently working with Hong Kong to use a development project as a pilot to incorporate elements of Hong Kong project management system. The SAR Government will strive for Guangdong to consider increasing the number of pilot projects, as well as to introduce the listing system of Hong Kong professional organisations and the registration systems of Hong Kong professionals and enterprises currently adopted in Qianhai to Nansha and Hengqin.

Environmental Protection

14. On environmental protection, the SAR Government will continue to implement the “Co-operation Agreement on Regional Air Pollution Control and Prevention among Guangdong, Hong Kong and Macao” which includes strengthening co-operation between Hong Kong and Guangdong in the monitoring of the air quality in the Pearl River Delta (PRD) region and in air pollution forecast and studies; taking forward the mid-term review study on air pollutant emission reduction targets for 2015 and 2020 and implementation of emission reduction measures. We will continue to implement the Cleaner Production Partnership Programme to facilitate Hong Kong-funded factories in Guangdong and Hong Kong to adopt cleaner production technologies and practice.

Tourism

15. The SAR Government will continue to maintain close liaison with the respective Mainland authorities to combat the problems arising from zero/negative tour fares and coerced shopping. The SAR Government will enhance communication and co-operation with the tourism authorities in the Mainland (including Guangdong Province) on measures on regulation of Mainland inbound tour groups, including sharing with the Mainland authorities information on the cost of receiving Mainland inbound tour groups in Hong Kong, enhancing transparency of the market, and stepping up efforts to promote “Honest and Quality Hong Kong Tours” to rebuild the image of Hong Kong in the eyes of Mainland tourists.

Co-operation in Education

16. To support more Hong Kong students in need of financial support to pursue undergraduate studies in the Mainland, the SAR Government has recently completed the review of the Mainland University Study Subsidy Scheme (MUSSS). Starting from the 2016/17 academic year, the MUSSS will be expanded to cover all Hong Kong students who are in financial need and pursuing undergraduate studies in a total of 155 Mainland institutions, irrespective of the channels of their admission to the institutions. Those 155 Mainland institutions comprise 84 institutions participating in the Scheme for Admission of Hong Kong Students to Mainland Higher Education Institutions (Admission Scheme) in the 2016/17 academic year and 71 institutions covered under the “Project 985”¹ and/or “Project 211”² of the Mainland authorities but not participated in the Admission Scheme. It is envisaged that the expanded

¹ “Project 985” was first taken forward by the Central People’s Government in 1998 by allocating a large amount of funding to certain top-notched universities to develop them into world-class universities. A list of the 39 Mainland institutions which fall under the “Project 985” is available at http://www.moe.gov.cn/publicfiles/business/_htmlfiles/moe/s6183/20112/xxgk_128833.html. All of them also fall under “Project 211”.

² “Project 211” was initiated in 1995 by the MoE with the purpose of raising the quality and standard of teaching, research, management and programmes of certain higher education institutions, so that they became the base of nurturing talents and cultivating strategies for socio-economic development. A list of the 112 Mainland institutions which fall under “Project 211” is available at http://www.moe.gov.cn/publicfiles/business/_htmlfiles/moe/s238/201002/xxgk_82762.html. Among the 112 Mainland institutions that fall under “Project 211”, 41 of them are covered under the 84 institutions that fall under the “Admission Scheme”.

MUSSS will benefit the bulk of Hong Kong students who are in financial need and pursuing undergraduate studies in the Mainland (including the Guangdong Province).

17. Furthermore, the Education Bureau of the SAR Government and the Department of Education of the Guangdong Province signed a “Co-operation Agreement on Guangdong-Hong Kong Sister Schools” in September last year with an aim to further promoting exchange and co-operation between sister schools in both places. Currently, there are 327 pairs of Guangdong-Hong Kong sister schools, accounting for about two-thirds of the total number of Hong Kong-Mainland sister schools. We will continue to assist secondary, primary and special schools in Hong Kong to form sister schools with their counterparts in Guangdong Province. It is expected that at least 60 pairs of sister schools will be added in the three school years from 2015/16 to 2017/18.

Other Key Co-operation Areas

18. The 2016 Work Plan covers a wide range of sectors for co-operation. In addition to the above, other key co-operation items include areas such as cross-boundary infrastructure, trade and investment, intellectual property, food safety, social security, etc.
